ORCID: 0009-0009-9047-6048

Nationality: Chinese

Personal Profile

I am a first-year PhD student in Mathematical Sciences at Durham University. I am working under the supervision of Wilhelm Klingenberg and Fernando Galaz-García.

My research interests lie in the Calculus of Variations and Geometric Measure Theory. Specifically, I am currently working on the Optimal Transport problem.

Education

2019-2022 BSc in Physics

University of Wisconsin, Madison

GPA: 3.83/4.00

2022 – 2024: MSc in Theoretical Physics

Utrecht University, Utrecht

GPA: 7.80/10.0

Thesis: Non-Equilibrium Dynamics of Tomonaga-Luttinger Liquid and Exceptional Points of Parafermion.

2024 – 2025: MSc in Mathematics

Durham University, Durham

GPA: first-class honours

Thesis: Solving the Monge Problem By Disintegration of Transport Sets.

2025 – present: PhD in Mathematics

Durham University, Durham

Academic Publications

A Sudakov Decomposition in Riemannian Manifolds with Positive Curvature. [arXiv:2603.18935]

Zhengyao Huang

Smirnov Decomposition of a Horizontal Vector Charge in the Heisenberg Group [to be appear on arXiv]

Zhengyao Huang, Wilhelm Klingenberg

Skills

Python, Mathematica

Languages: English (Fluent), Chinese (Native)
